Journal of Hydrology 210 (1998) 285–286

Journal of Hydrology

Contents

The influence of heat conduction on evaporation from sunken pans in hot, dry environment
I.M. Oroud 1
A new method for the interpretation of the constant-head well permeameter
G. Cassiani 11
Quantifying groundwater discharge to a small perennial stream in southern Ontario, Canada
E.E. Cey, D.L. Rudolph, G.W. Parkin and R. Aravena 21
Uncertainty assessment and analysis of the calibrated parameter values of an urban storm water quality model
E. Guame, J.-P. Villeneuve and M. Desbordes 38
Interannual variability in western US precipitation
B. Rajagopalan and U. Lall 51
Seasonal rainfall partitioning under runon and runoff conditions on sandy soil in Niger. On-farm measurements and water balance modelling
J. Rockström, P.-E. Jansson and J. Barron 68
An improved methodology to measure evaporation from bare soil based on comparison of surface temperature with a dry soil surface
G.Y. Qiu, T. Yano and K. Momii 93
Estimation of the water balance of alluvial aquifiers in region of high isotopic contrast: an example from southeastern France
Y. Guglielmi, J. Mudry and B. Blavoux 106
A model to couple overland flow and infiltration into macroporous vadose zone
H. Raun and T.H. Illangasekare 116
Using regional regression within index flood procedures and an empirical Bayesian estimator
H.D. Fill and J.R. Stedinger 128
Hydrological behaviour of a small catchment in the *dehesa* landuse system (Extremadura, SW Spain)
A. Ceballos and S. Schnabel 146
Water balance of a tropical woodland ecosystem, Northern Australia: a combination of micro-meteorological, soil physical and groundwater chemical approaches
P.G. Cook, T.J. Hatton, D. Pidsley, A.L. Herczeg, A. Held, A. O'Grady and D. Eamus 161
Multisite generalization of a daily stochastic precipitation generation model
D.S. Wilks 178
Maximum-likelihood estimation of unsaturated hydraulic parameters
K.J. Hollenbeck and K.H. Jensen 192
Optimal selection of number and location of rainfall gauges for areal rainfall estimation using geostatistics and simulated annealing
E. Pardo-Igúzquiza 206
A comparison of drainage networks derived from digital elevation models at two scales
X. Wang and Z.-Y. Yin 221
Streamflow response of Belgian catchments to IPCC climate change scenarios
D. Gellens and E. Roulin 242
Variability in surface moisture content along a hillslope transect: Rattlesnake Hill, Texas
J.S. Famiglietti, J.W. Rudnicki and M. Rodell 259

Book Reviews

Hydrology for engineers, geologists and environmental professionals. An integrated treatment of surface, subsurface and contaminant hydrology by Sergio E. Serrano
S.P. Simonovic 282

Groundwater Pollution, Aquifier Recharge and Vulnerability by N.S. Robins
J.W. Lloyd 283
Integrated watershed management: principles and practice by Isobel W. Heathcote
R.B. Grayson 283
